Patient Pete wants to send copies of his most recent visit to a hospital's emergency department to his primary care provider. He goes to the hospital's medical record department to see how he can get this done. The medical records technician informs Pete that he can request access to his records and will need to fill out a form. The medical records technician hands Patient Pete a form used to request access to medical records which Pete fills out and gives back to the technician.

The medical records technician tells Pete that under HIPAA, in order for Pete's request to be processed, he needs to provide an expiration date for his request.

Which of the following would be acceptable expiration dates under the HIPAA regulations to use to process Pete's request for access to his medical records?

- A. Pete uses a specific date. Today's date is 1/3/2019 so Pete adds two weeks and uses "1/17/19".
- B. Pete does not use a specific date. He references a date by writing on the space for the expiration date "from one year from the date of my signature"
- C. Pete does not identify or reference a date but an event. He writes "for as long as the hospital maintains my medical records".
- D. All of the above
- E. None of the above
